Professional Design Consultancy with the Resources and Experience to Provide Expert Engineering Results at Realistic Costs.

Since the new Millennium, Commercial Design's design consultancy services have assisted the Australian mining industry with its special blend of expert technical consultancy business acumen and mining savvy. Client satisfaction and total quality as an expert consultant have been and will continue to be our top priorities and the focus of Commercial Design's strategic business plans. That is what makes us the consultant of choice in the mining, engineering, utility, and government industries.

Our Consulting Company culture is focused on long-term service to the mining industry is an ideology that will perpetuate. Our goals are to continue to focus on client satisfaction through total quality and an increased awareness of the global economy and its impact on the mining industry.

As a mining consultant, Commercial Design experts have achieved these goals in a number of ways, we hire and retain the best people relative to the mining industry, invest in advanced technologies and information resources and concentrate our business as an independent mining consultant. Finally, we as an expert consultancy, treat our clients with respect, fairness and honesty. This is reflected in the amount of repeat business from clients with unsolicited requests.

Commercial Design's business relationships relative to the mining industry are based on mutual respect, realistic budget estimates of project costs and timely completion of scheduled tasks. As an expert mining consultancy, sincere and dedicated effort is made to complete each project on time and within budget.

In our 40 plus years in Engineering Consultancy, Commercial Design has established an unparalleled reputation for integrity and independence.

As a premier consultant, Commercial Design reports meet the standards of major institutions and government agencies.
